SUMMARY

Aspiring Software Engineer with foundational knowledge in MERN Stack and a keen interest in full stack web development. Developed project-based understanding of building dynamic web applications using MongoDB, Express.js, React, and Node.js. Seeking a Software Engineer position to leverage this solid technical base in delivering innovative solutions and gaining practical industry experience.

PROJECT

SmartInvest – Investment Dashboard (Zerodha Clone)

Academic Project • June 2025 – July 2025

- A feature-rich investment platform inspired by Zerodha, enabling users to view holdings, manage portfolios, and execute stock transactions in real-time.
- Includes secure login, dynamic dashboards, and a responsive UI for a seamless user experience.
- Built with a tech stack comprising React.js, Node.js, Express.js, MongoDB, and Material UI.

WanderLust

Personal Project • full-stack-project-xygh.onrender.com/listings • April 2025 – May 2025

- Launched WanderLust as a dynamic travel planning platform that integrates personalized itinerary creation, enables seamless collaboration between travelers, and elevates user retention through engaging features.
- Champion the creation of journeys as unique as each traveler, shaping personalized experiences at WanderLust.
- Curate engaging features and tools that foster retention and transform planning into a joyful adventure.
- Built with a robust tech stack including HTML, CSS, Bootstrap, Node.js, Express.js, and MongoDB to ensure a responsive, scalable, and user-friendly platform.
